

Institutional Distinctiveness

We, at Dinabandhu Mahavidyalaya, are committed to provide our students with the best possible education within our limited means. Orders have been placed for procuring equipment essential for the imparting of this sophisticated medium of education, including laptops, digital projectors, makeshift screens, etc. A serious effort is already in effect towards making more and more classrooms ICT compliant. The teachers of various departments are already providing their students with web-based materials and resources. The current session had to lay stress on online classes as well as online examinations and internal assessments owing to the crisis caused by the COVID-19 pandemic. Teachers and students interacted in virtual classrooms through online platforms, mostly Google Meet. Teachers put in the best efforts to make the online classes an effective substitute for the on-site classes as much as possible.
